19 years old | Togolaise

## PROFESSIONAL PROFILE

Currently a second-year student in Computer Science and Systems at the University of Lomé, I am motivated to continue learning and evolving in this exciting field. With over 3 years of experience in Web and Mobile development, I am an experienced and versatile developer who has a deep understanding of technologies such as C, C++, C#, Python, HTML5, CSS3, JavaScript, React, Angular, and Node.js. Additionally, I have significant experience in designing and developing dynamic websites and mobile applications, while having a good understanding of data security and privacy principles to apply to my projects. I have also undergone training in machine learning with tools such as TensorFlow, enabling me to develop intelligent applications and analyze data for useful insights. Overall, I am a determined and passionate student who is ready to take on any challenges that come my way in the field of computer science and information technology.
